I was initially sceptical of how accurate the modelling would be of the handling and the jet engine response.. Tool-tips show when you hover over a switch or dial to help you learn the function of the cockpit.. I was extremely impressed by the headset integration and immediately felt operational pilots could benefit from training on this software.. To say I was impressed would be an understatement I found the controls and aircraft responses accurate.

In its weapons and tactical training role the Hawk is used to teach air combat, air-to-air firing, air-to-ground firing and low-flying techniques and operational procedures.. “As a current Royal Navy aggressor pilot operating the Hawk T1, I was offered the opportunity to test the VEAO Hawk simulator.. The flight model performs as well as the full motion simulator used by the RAF Flying in formation was easy and very similar to the real thing.. Each switch and dial can be mapped to keyboard, joystick or a HOTAS system Full cockpit familiarization training missions are included to help you learn each function of the aircraft.
